

The SWEN Software Engineering Network is very pleased to invite you for two workshops:

Agile Development in Practice for managers and for developers

Conducted by:

Kevlin Henney, software architect and a pragmatic agilist

Agile development promises a more reactive and responsible approach to development. But what does this mean in practice for managers and other non-developer roles or developers? There are many misconceptions about what agile development entails for project management, ranging from no management to extreme management and also for day-to-day programming, ranging from a lack of discipline to a straitjacketed and rule-driven regime.

These issues will be tackled in the two workshops:

Workshop 1: Agile Development in Practice for Managers

The goal of the Agile Development in Practice for Managers workshop is to present a sample of many of the process ideas that agile development encompasses (including XP, Scrum and Lean Development), and also many of the practices individuals, teams and companies find beneficial, addressing questions of decision making, development activities, planning and requirements.

Workshop 2: Agile Development in Practice for Developers

The goal of the Agile Development in Practice for Developers workshop is to present a sample of many of the practical ideas that agile development encompasses (including XP, Scrum and Lean Development), and also many of the practices individuals, teams and companies find beneficial, addressing questions of decision making, testing, coding style, incremental design and refactoring.

Kevlin Henney

Kevlin Henney is an independent consultant and trainer based in Bristol, UK. He has variously developed and delivered training courses, consultancy and software across a number of domains ever since getting involved in professional software development in the late 1980s. Kevlin's work focuses on software architecture, patterns, development process and programming languages.

Dates:

WS1: Thursday, 10. Dec. 2009
8:30 am – 16:30 pm
Friday, 11. Dec. 2009
8:30 am – 16:30 pm

Place:

Technopark Zürich
Technoparkstrasse 1
8005 Zürich

Target Audience

Project Manager, R&D Manager, CEO of SME's who want to know what agile development means from management perspective and how it is done in practice.

Software Developers who want to learn best practices of agile software development and how to implement them in their projects.

Programm

Weitere Informationen zu den Workshops und das detaillierte Programm finden Sie auf unserer Website

Workshop-Sprache ist English

Die Teilnehmerzahl ist auf 20 pro Workshop beschränkt

Info

Falls Sie Fragen haben oder weitere Auskünfte wünschen, so wenden Sie sich bitte an:

Hochschule Luzern
Technik & Architektur
SWEN Sekretariat
Frau Adela Smajic
Technikumstrasse 21
CH-6048 Horw
adela.smajic@hslu.ch

Kosten

Die Veranstaltung ist für SWEN Mitglieder kostenlos.
Für Nicht-Mitglieder 150.- SFR pro Workshop
(inkl. Mittagessen).

Anmeldung

Sie können sich hier anmelden:
